

RI TRANSPARENCY REPORT 2020

Ardian

An investor initiative in partnership with UNEP Finance Initiative and UN Global Compact

About this report

The PRI Reporting Framework is a key step in the journey towards building a common language and industry standard for reporting responsible investment (RI) activities. This RI Transparency Report is one of the key outputs of this Framework. Its primary objective is to enable signatory transparency on RI activities and facilitate dialogue between investors and their clients, beneficiaries and other stakeholders. A copy of this report will be publicly disclosed for all reporting signatories on the <u>PRI website</u>, ensuring accountability of the PRI Initiative and its signatories.

This report is an export of the individual Signatory organisation's response to the PRI during the reporting period specified above. It includes their responses to mandatory indicators, as well as responses to voluntary indicators the signatory has agreed to make public. The information is presented exactly as it was reported. Where an indicator offers a response option that is multiple-choice, all options that were available to the signatory to select are presented in this report. Presenting the information exactly as reported is a result of signatory feedback which suggested the PRI not summarise the information.

PRI disclaimer

This document presents information reported directly by signatories. This information has not been audited by the PRI Secretariat or any other party acting on their behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented, and no responsibility or liability can be accepted for any error or omission.

Usage restrictions

Public Transparency Reports are the intellectual property of PRI. Under no circumstances, can this report or any of its contents be sold to third parties.

Ardian has been a signatory of the PRI since 2009 and fully integrates all six principles in the investment process.

The wide variety of investment activities at Ardian requires a tailored approach to ESG for each one. ESG in taken into account at each stage of the investment process for each activity with the support of the Sustainability team as well as the Investment team.

This tailored approach is detailed at length in the Responsible Investment Policy (attached)

REVIEW & REPORTING

Ardian believes that transparency is the foundation of long-term partnerships and is committed to complying with the highest standards of reporting to all stakeholders.

Ardian systematically provides specific ESG related information to LPs through fund management reports, at management company, fund and portfolio level. In semi-annual reports, Ardian includes individual factsheets of each portfolio company reviewed as part of Ardian ESG engagement program, highlighting material ESG issues and evolution of the performance on relevant KPIs.

The following channels are used by Ardian to communicate ESG-related information to LPs:

Ardian's website, which contains a section on responsible investment

- Ardian's activity report, which systematically includes a section on CSR and Responsible Investment and Ardian's sustainability report provided details on sustainability approach with concrete initiatives implemented in the portfolio.
- Ardian Sustainability Report which is publicly available on Ardian's website
- Annual General Meetings (AGM) with sections on sustainability in each fund's overview and dedicated presentation on Sustainability in June 2019
- Ardian PRI's assessment report is publicly available on Ardian's website

For more details, please see Ardian's Responsible Investment Policy which is attached.

SG 07.2

For the roles for which you have RI oversight/accountability or implementation responsibilities, indicate how you execute these responsibilities.

SUSTAINABILITY WITHIN ARDIAN

Sustainability within Ardian relies on a tailored model to meet our unique business philosophy, a dedicated team and involvement from a wide variety of teams.

1- Dedicated Responsible Investment staff (Oversight and implementation)

Ardian has a Sustainability team composed of five full-time employees. The team is responsible for developing and implementing the strategy across all of Ardian's activities throughout the offices at corporate and investment level.

The Sustainability team aims to provide guidance to all Ardian teams, develop and implement Ardian's Sustainability approach in investment process and answer questions LPs could have.

2- Board members/trustees and CEO (oversight/accountability)

Ardian's Sustainability team reports to Philippe Poletti who is a member of the Executive Committee. This allows the Sustainability team to directly report to the Executive Committee of Ardian and make sure that the Sustainability strategy is in line with the global strategy

Ardian's Sustainability Committee is composed of 13 top management representatives from the investment teams and support functions, including 5 members of Ardian's Executive Committee.

The Sustainability Committee meets quarterly to provide input to the global Sustainability strategy at Ardian and monitor progress.

3- Compliance and Risk (oversight and implementation)

Ardian's Head of Global Compliance is a member of the Sustainability Committee of Ardian.

4- Investment Committee (oversight and implementation)

The results of ESG due diligence is systematically included in the investment memo presented to the investment committee. The Investment Committee may reject an investment if ESG risks are too controversial and if no levers for improvement have been identified. However, this situation never occurred in the past.

5- Portfolio Managers (oversight and implementation)

Throughout the holding period, the Sustainability team provides support to the portfolio companies and actively monitors the evolution of their ESG practices. Ardian Portfolio Managers maintain continuous dialogue with companies' management team on ESG issues.

6- Investment analyst (oversight and implementation)

Systematic ESG analysis is performed by the Investment Team according to the Fund's investment strategy and to the specifics of every opportunity, with the support of Ardian's Sustainability team.

7- Investors Relations (oversight and implementation)

With support of Sustainability team, Investor Relations answer all potential questions clients may have on sustainability and implementation of the strategy at fund level in the context of due diligence.

The investors relation team is also in charge of reporting to investors about Ardian's Sustainability approach within the portfolio with the full support of the ESG team.

8- Services providers (implementation)

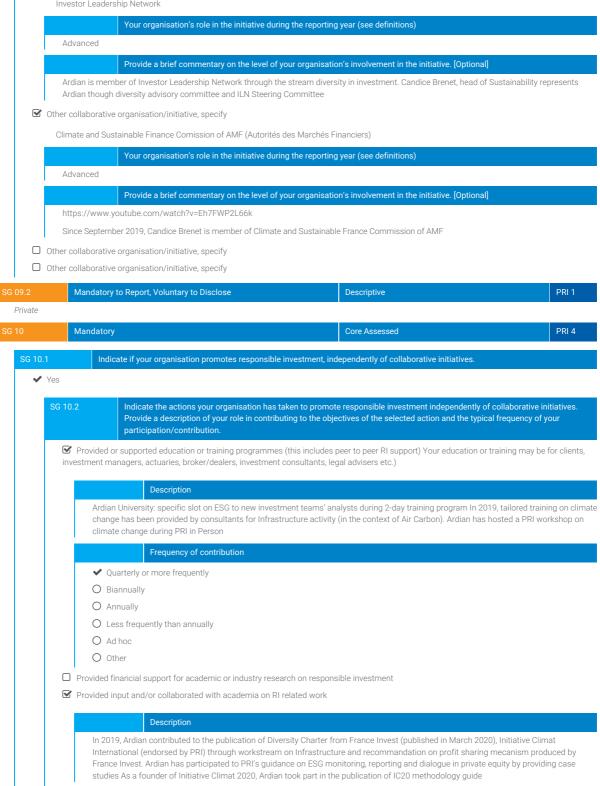

Ardian regularly works with external consultants for specific ESG due diligences and portfolio companies annual ESG reviews

	Exposure to carbon-related assets
	Other emissions metrics
_	Other, specify
\Box	None of the above
G 14	.4 If you selected disclosure on emissions risks, list any specific climate related disclosure tools or frameworks that you used.
Fo	r its Buyout activity:
	order to meet its voluntary commitments with regard to climate change and to comply with regulation, Ardian has initiated a three-stage process to entify for which portfolio companies climate change is a material issue:
1.	Assessing materiality: identification of portfolio companies for which climate issues are material
2.	Measuring emissions: if the subject is considered material, the carbon footprint is measured and monitored throughout the holding period, either based

3. Taking actions: The results of this materiality analysis enabled Ardian to identify action plans to improve its portfolio companies' impact regarding climate change and the energy and ecological transition. Such actions include implementing recommendations made by energy auditors (e.g. installing LED lamps and WRG ventilation systems, changing air circulation systems and water pumps), monitoring greenhouse gas emissions on a regular basis at both local and Group level, setting energy consumption reduction targets, etc.

on the companies' own data when they had already conducted such an analysis, or through proxies (energy consumption of the company, benchmark of

companies). At this occasion, Ardian identifies with the company management team the major sources of emissions

However, for all portfolio companies in the scope of the sustainability annual review, Ardian assesses physical and transitional risks for the company.

For its Expansion activity:

In order to meet its voluntary commitments with regard to climate change and to comply with regulation, Ardian has initiated an in-depth analysis for its Expansion portfolio:

Measuring emissions: carbon footprint is measured (scope 1 and 2), either based on the companies' own data when they had already conducted such an analysis, or through proxies (energy consumption of the company, benchmark of companies). This allowed Ardian to identify major sources of emissions.

• Analyzing physical and transitional risks based on TCFD recommendations. Transitional risks include: policy and legal risks, technology risks, market risks and reputational risks.

• Taking actions: the results of this analysis enabled Ardian to identify action plans to improve its portfolio companies' impact regarding climate change and the energy and ecological transition. Such actions include implementing recommendations made by energy auditors (e.g. installing LED lamps and WRG ventilation systems, changing air circulation systems and water pumps), monitoring greenhouse gas emissions on a regular basis at both local and Group level, setting energy consumption reduction targets, etc.).

For Infrastructure activity:

In line with public commitments, Ardian has performed a maturity and performance assessment of portfolio assets' climate approach. As such, a modelling of carbon emissions of the portfolio and for each individual asset was performed for scopes 1, 2 and 3. In addition to modelling carbon scenarios and trajectories, the aim was to identify emission reduction levers and determine specific targets (including SDG 13[1]) for each portfolio asset during the life

_

	GPs Annual Survey		ual Survey		

• Through ESG performance indicators updated annually at year end.

During the holding period, the investment team monitors companies' ESG profile and initiatives, on a case-by-case basis :

Through Supervisory Boards when Ardian is a member;
Through active dialogue with the lead sponsors or companies' management when appropriate;

HOLDING PERIOD

For it's Fund of fund activities, Ardian has developed individualized scorecards for each GP answering the survey which highlights key strengths, opportunities for improvement and benchmarks performance against peers while assessing progress made year to year. Ardian offers individualized feedback sessions with GPs who wish to better understand their scorecard as we believe this is fundamental for encouraging best ESG practices within our portfolio. To the best of our knowledge we are one of the only LPs in the market that offers this level of feedback following annual ESG reporting Profit Sharing Ardian was the first private equity firm in France to call for the redistribution of a portion of buyout capital gains to employees of portfolio companies on a systematic basis (when certain conditions are met), and therefore consistently seeks to extend portfolio companies' profit sharing mechanisms whenever possible. Ardian strongly believes that such alignment of interests is a key lever for long term value creation. Since 2008, Ardian implemented capital gain sharing schemes with 23 000 employees of 31 portfolio companies, sharing a total of over €53 million. Sustainability methodology assessment In 2019, Ardian has build a new sustainability assessment that extends the ESG analysis formelrly focused on operations an internal processes to the impact analysis on the entire value chain (supply chain, operations and product & services). This new methodology is based on existing referential framework developped within the industry: UNEP FI, Sustainable Developpement Goals, Impact Management Project. CO2 Modelling In 2019, Ardian performed a comprehensive carbon assessment of its Infrastructure assets. A 4-step approach was used to model portfolio companies' current and projected emissions and calculate 2°C targets. Estimation of scopes 1, 2 and 3 GHG emissions Calculation of a 2°C trajectory using Science Based Targets (SBT) methodology Modelling of projected emissions with a business-as-usual case based on the IEA Reference Technology Scenario (RTS) Assessment of the gap to be bridged between the 2°C trajectory and the business-as-usual scenario O No

Additional information [Optional]

Transparency and reporting on ESG policies and practices is of great importance to Ardian. Due to legal and confidentiality constraints, information reported to clients (LPs) it is not fully made public.

In line with its commitment to the ESG Disclosure Framework Ardian always seeks transparency, dialogue and alignment of interests with LPs. All Management Reports to Investors include a formal dedicated ESG section that describes how ESG considerations are integrated in the funds' investment and monitoring processes. Management Reports also provide individual fact sheets integrating material ESG issues for portfolio companies how those issues are being addressed and relevant KPIs.

The Sustainability team provides responses to all investors' queries concerning the firm's ESG policies and practices.

For the general public, Ardian publishes an annual Activity Report and a Sustainability Report that systematically includes information on ESG initiatives and its website has a Sustainability section.

	Private equity	Infrastructure
ESG performance development targets		
ESG score		
ESG weight		
Real world economy targets		
Other RI considerations		
None of the above		

You selected an `Other` option in table SAM 02.4 above, please specify

Investment restriction in primary funds

SAM 02.5

2.5 Describe how the ESG information reviewed and discussed affects the selection decision making process.[OPTIONAL]

In the due diligence phase, the Fund of Funds team integrates non-financial considerations to assess GPs and to make sure that their activity is in line with Ardian's Responsible Investment policy as well as our clients' interests. Ardian wishes to promote best practices across its managers and as such, has developed internal tools to assess their current involvement and to score their progress over time. In addition, Ardian applies a negative screening approach, outlined in Ardian's Responsible Investment Policy. We refuse to invest in the tobacco and pornography industries and exclude any investments in companies manufacturing and/or distributing controversial weapons. Ardian defines controversial weapons as weapons having a disproportionate impact on civilian populations, such as chemical weapons, biological weapons, nuclear weapons, anti-personnel landmines and cluster bombs. The investment team evaluates the overall commitment to responsible investment of the GPs and the level to which they integrate ESG factors into their investment process. For primary transactions, this analysis results in a rating which represents 10% of the overall score which will be considered during the decision-making phase. When not in a position to undertake an in-depth analysis of the investment (for secondary transactions), the investment team seeks to identify public commitments made by the GPs in terms of responsible investment (adherence to the PRI or AIC) to get an indication of their position on the subject. As a general rule, Ardian favors GPs which have long-lasting relationship with the Funds of Funds team and whose practices are advanced, particularly in terms of integration of extra-financial aspects.

SAM 04 Mandatory

M 04.1 Indicate if in the majority of cases and where the structure of the product allows, your organisation does any of the following as part of the manager appointment and/or commitment process Sets standard benchmarks or ESG benchmarks

Core Assessed

- ☑ Defines ESG objectives and/ or ESG related exclusions/restrictions
- Sets incentives and controls linked to the ESG objectives
- Requires reporting on ESG objectives
- Requires the investment manager to adhere to ESG guidelines, regulations, principles or standards
- Other, specify (1)
- Other, specify (2)
- None of the above

Provide an example per asset class of your benchmarks, objectives, incentives/controls and reporting requirements that would typically be included in your managers' appointment.

Asset class

🗹 Private equity

- Benchmark
- Standard benchmark, specify
- 🗹 ESG benchmark, specify

For the Fund of Funds activity, along with active dialogue with GPs, an ESG monitoring survey was developed in 2010 in order to raise awareness of ESG and evaluate their progress over time. This survey is sent annually to Ardian's GPs in order to address both primary and secondary transactions. Collected data allows to follow up on progress for each individual fund, and the ESG performance data is then stored in Ardian's database. This information also allows Ardian to establish an ESG benchmark for GPs. The ultimate goal is to encourage GPs to incentivize ESG integration by portfolio companies and improve non-financial impact of portfolio over time.

PRI 1

ESG Objectives

🗹 ESG related strategy, specify

The investment team evaluates the overall commitment to responsible investment of the GPs and the level to which they integrate ESG factors into their investment process. In 2019, two new questions were integrated aiming at assessing GPs commitment to diversity at corporate level, as well as their use of the Sustainable Development Goals framework for ESG portfolio monitoring"

🗹 ESG related investment restrictions, specify

For primary investments, in order to ensure an alignment of interests, Ardian can seek to negotiate clauses in side letters barring investments in sectors banned by the Responsible Investment Policy whenever it is deemed necessary. These side letters request that underlying fund manager acknowledges Ardian's Responsible Investment Policy and its commitment to the UNPRI

ESG integration, specify

🗹 Engagement, specify

The aim of the annual ESG Survey is to engage with our GPs on subjects that matter to Ardian on an annual basis. An excerpt from the study based on the results of the ESG monitoring is sent to all participating GPs in order to share an overview of the trends and best practices observed in the industry and to encourage them to strengthen the ESG integration in their investment process. On this occasion, Ardian sends GPs their individual scorecard and can arrange a debriefing call on request. This represents the opportunity for an open and qualitative discussion on the evolution of the GPs ESG performance, its good practices and areas for improvement.

- Voting, specify
- Promoting responsible investment

By sending the survey to all its GPs, Ardian promotes the key issue of ESG integration into GPs' process. The number of GPs answering the survey is increasing every year.

SG specific improvements

Ardian gives personal feedback on ESG scorecard. Ardian shares with GPs examples of best practice and specify specific improvement to encourage them strenghten the ESG integration in their investment process.

Other, specify

🗹 ESG guidelines/regulation, principles/standards, specify

In the annual survey send to GPs, there is a specific question about level of engagement regarding UNPRI, Carbon Disclosure Project, Walker Guidelines, Global Compact, SIF Network, ILN.
